

CALL FOR APPLICATIONS: STIBET I Scholarship Program for International Students and Doctoral Candidates

What is funded?

- Graduation Scholarships: Support for achieving a successful degree completion within one year, allowing scholars in financial distress (through no fault of their own) to focus on their studies and graduation.
- Contact Scholarships: For students from foreign partner universities or universities with which partnership agreements exist.
- Scholarships for Special Commitment: Awarded to international students and doctoral candidates who have demonstrated good academic performance and outstanding commitment in an international context at their university. The commitment must not be linked to any obligation (no services, no employment, etc.).
- Scholarships for Equal Opportunities: For students facing special challenges in their studies (e.g., refugees, persons with disabilities or chronic illnesses, and those with caregiving responsibilities for children or dependents).

Who can apply?

- All international students and doctoral candidates who are officially enrolled at hmt. “Vorstudium” students are not eligible.
- There is no simultaneous entitlement to other scholarships. However, if students or doctoral candidates receive a partial scholarship that is not funded by DAAD, additional funding up to the amount of a full scholarship is permitted.
- Students and doctoral candidates may generally work alongside their studies. If the total amount from the scholarship rate and gross additional earnings exceeds €1,454 for students or €1,820 for doctoral candidates, the scholarship rate will be reduced accordingly. This limit applies to each month in which secondary employment is undertaken.

Application Documents:

- Completed online application form
- Bank statements from the last three months of all existing bank accounts in a single PDF file

Application Process:

The application is submitted online via the [application form](#). The PDF file containing the bank statements must be uploaded there.
